

Wine Well Chillers

“The best equipment purchase I ever made.”

– The most frequent comment by new owners of Chillers.

Wine Well Microchiller

**The WINE WELL II-BX™
and MICROCHILLER™
quick-chill wine,
liquor, beer, soda,
fruit juices and more.**

Our Chillers are powerful, proven customer-pleasers, used in many thousands of retail stores, restaurants and convenience stores.

Wine Well Chillers are also...

- highly energy-efficient
- as reliable as the sunrise, simple to service, and we back them completely.
- virtually maintenance-free – 5 minutes per week to check the water level, plus a change of water monthly.
- in use throughout the world; produced and continually improved since 1974.
- a certain profit center from added impulse buying during the short wait for chilling.

Wine Well II-BX Chiller

- No water connections required.
- Plug into any standard 115 volt outlet.
- Greatly improves customer service.
- A true green machine with energy

How it Works

With a 40 pound (18kg) flowing water charge maintained at 34°F (1°C), the Chiller can reduce the temperature of a 750 ml. bottle of wine to 50°F (10°C) in 6 minutes, 45°F (7°C) in 7-8 minutes. This performance is 25 times faster than can be accomplished in an air-based storage refrigerator.

The Chillers require no water connections. The only regular maintenance is to check the water level weekly, add makeup water, and change the water periodically. All Chillers are on casters for easy mobility anywhere in the facility.

A paper towel drying cabinet is available identical to the Microchiller model except the top is solid (shown at right). Standard colors for the Microchiller are Almond, Gray and Black.

Microchillers are available in grey, almond or black.

Chiller Specifications

	II-BX MODEL	MICROCHILLER MODEL
Dimensions:		
Height:	32 inches (81 cm.)	33.5 inches (85 cm.)
